

# Laboratory Equipment Set

## LES-Basic

### 1. Forensic Light Kit

---

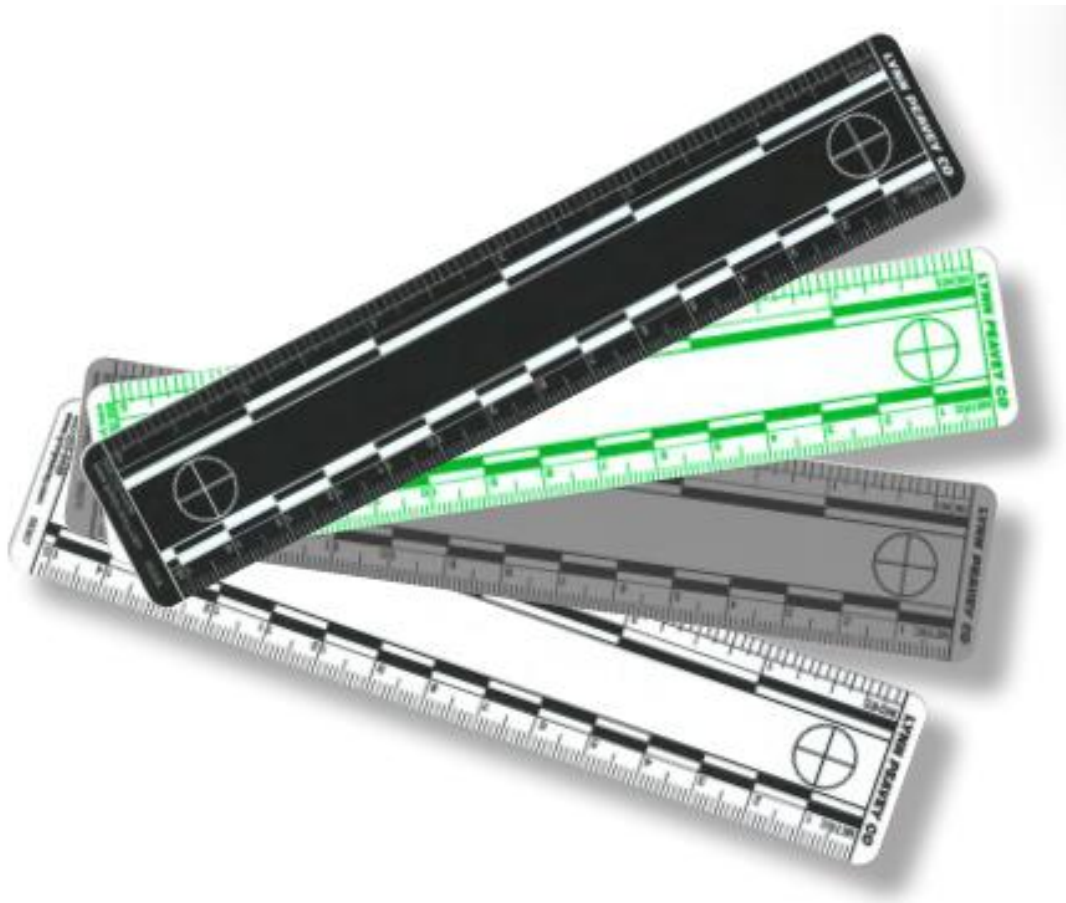

Originally designed to meet the needs of forensics, the Forensic Light Kit is the perfect tool for crime scene investigation and evidence collection.

Each rugged 3-watt forensic light features a variety of features, including single-beam LED output, a power switch to conserve battery life, and a thumb switch (on-off). Shock, dust, and moisture resistance provide superior durability. All light heads are interchangeable (and other colors (wavelengths) are available upon special request.

Quantity: 3 pc.

## 2. Ruler Set

---

An essential item for close-up crime scene evidence photography, the Ruler Set shows evidence dimensions and has a writeable surface. The reusable ruler has a crosshair on each end to aid in calibrating photogrammetric images. Measures in inches and millimeters.

The versatile magnetic ruler is perfect for mounting on cars, metal doors, filing cabinets, etc. The flat, non-glare finish eliminates reflections when taking photos.

Quantity: 10 pc.

### 3. Protection Goggles

---

Wraparound safety glasses allow for alternative light sources to be used in any position. The popular orange safety glasses work best in most situations to enhance evidence. The safety glasses are packaged in a carrying case.

Fit-Over-Frame glasses are comfortable, lightweight, and durable black rubberized nylon frames designed to fit over prescription glasses. These glasses will fit comfortably over most styles of glasses.

Quantity: 6 pc.
